

ONE DISTRIBUTION SIGN SOLE PARTNERSHIP WITH CYREN.

One Distribution will distribute Cyren's cloud security solutions via resellers throughout the UK and Ireland.

London, UK – August 22, 2018– One Distribution, a leading technology distributor, today announced it has signed a sole distribution partnership agreement with Cyren to distribute Cyren's award-winning SaaS internet security products to resellers throughout the UK and Ireland.

Cyren's security products provide superior cyber security to organisations of all sizes, inspecting web and email traffic in real time and stopping cyber threats before they reach a user's browser or inbox. Cyren products are powered by [Cyren GlobalView™](#), a cloud platform that identifies emerging internet threats in seconds by analysing more than 25 billion security transactions generated by 1.3 billion users daily.

Cyren's cloud security solutions are uniquely suited to enable resellers in their efforts to protect their customer organisations. Cyren products have been built to support a multi-channel environment, with features that enable resellers to directly streamline configuration, provisioning and administration for ease of support and improved customer outcomes.

One Distribution's network of resellers will offer Cyren's complete suite of award-winning, cost-effective and easy-to-manage internet SaaS security products, including:

- **[Cyren Email Security](#)** – a comprehensive cloud-based secure email gateway that filters an organization's inbound and outbound email to protect users from spam, phishing, evasive malware, Business Email Compromise, ransomware, and more. Cyren Email Security's advanced threat protection capabilities include a patent-pending cloud sandbox array, impostor protection, and time of click protection, and an add-on email archiving service provides easy-to-use eDiscovery and regulatory compliance.
- **[Cyren Web Security](#)** – a 100% cloud-delivered secure web gateway that protects employees from advanced malware, ransomware and phishing wherever they are, and on whatever device they may be using. Powerful policy and reporting capabilities deliver unprecedented real-time visibility into web usage, including "shadow IT" discovery and control.
- **[Cyren DNS Security](#)** – a DNS-based web filtering service to quickly and easily protect employees in offices, customers at stores, students on campus, or guest Wifi users. Simple to set up, Cyren DNS Security can block malicious phishing and botnet sites, stop people from accessing porn or gambling sites, enforce "safe search", ensuring a good web experience for users and protecting an organisation's brand.

"We are excited to have signed our first partnership agreement with Cyren" says *Frank Richmond, Managing Director, One Distribution*. "We've been searching for the right cloud security solution to partner with and by adding Cyren to our portfolio, we know we are offering a superior cloud security solution for all of our partners."

"We are really looking forward to working with the team at One Distribution." – says *Atif Ahmed, Vice President Sales EMEA & APAC, Cyren*. "Their expertise and relationships within the channel community will make them one of the stand out technology distributors bringing value back to the industry."
